

Dear Members of the Public Health Committee:

S.B. No. 858 unadvisedly permits the prophylactic treatment of minors for sexually transmitted diseases without parental consent. Approving this bill would infringe upon parental rights and expose children to severe vaccination side effects.

A parent should have the right to decide a child's well-being. The State should not butt into a critical life decision. Vaccinating a minor without parental consent runs afoul of the 4th Amendment. Youngsters do not have the knowledge to provide informed consent. They may lack awareness of their own medical history, including reactions to medications and vaccinations. The decision must therefore fall to the parents. Statute prohibits schools from administering Tylenol or Epipen without parental consent. How can any less protection possibly apply to vaccination?

The HPV vaccine causes severe adverse reaction in many people:

- 1) The Vaccine Adverse Event Reporting System, VAERS, reports that the HPV vaccine can cause disability, cancer, or death (see attached chart).
- 2) Current Los Angeles superior court case Jennifer Robi v. Merck and Kaiser Permanente alleges Gardasil-related fraud.
<https://childrenshealthdefense.org/news/court-hears-gardasil>
- 3) In Ireland, Gardasil has made healthy girls sick. Report: Ireland Fights HPV Vaccine Injury & Pharma Control; <https://youtu.be/5tmeshBn4EE>
- 4) Extensive research by Dr. Jesper Mehlsen, research director and consultant at Germany's Frederiksberg Hospital, concluded that "a realistic estimate is that one in 500 girls experiences serious side effects [to the HPV vaccine]."
In Spain, University of Alicante doctor and professor of public health Carlos Alvarez-Dardet initiated a petition against the HPV vaccine. Alvarez-Dardet served as President of the European Public Health Association (EUPHA) and advised the World Health Organization. He calls for an immediate stop to administration of the vaccine.

- 5) Many other studies write about HPV vaccine risk.

A lowered probability of pregnancy in females in the USA aged 25–29 who received a human papillomavirus vaccine injection

<https://www.tandfonline.com/doi/abs/10.1080/15287394.2018.1477640>

6) Former CBS News journalist Sharyl Attkisson has exposed vaccine-caused health problems. The January 6, 2019 video report “Full Measure with Sharyl Attkisson” covers legal actions regarding the “alleged fraud and obstruction of justice” at the little-known Vaccine Court.

<http://fullmeasure.news/news/cover-story/the-vaccination-debate>

7) Florida Congressman Bill Posey speaking on July 29, 2015 from the House floor about a CDC whistleblower exposing CDC deception.

<https://www.youtube.com/watch?v=qxr-cv-Jul8>

The United States has the highest vaccination rate in the world. The vaccination schedule includes 72 dosages, a huge increase from 1983's 24 dosages and 1962's 3 dosages (see attached vaccines dosage chart). 54% of American children nevertheless suffer from chronic diseases, according to the CDC. Such diseases include severe asthma, allergies, ADD, developmental problems, autism (1 in 36 children), obesity, and diabetes. In addition, America has among the highest infant mortality rates in the world.

The United States Supreme court ruled in 1986 that vaccines are unavoidably UNSAFE. Vaccines contain toxic ingredients such as aluminum, formaldehyde, and thimerosal. Pharmaceutical companies must eliminate them. See “Excipients Included in U.S. Vaccines, by Vaccine.”

<https://www.cdc.gov/vaccines/pubs/pinkbook/downloads/appendices/B/excipient-table-2.pdf>

An explanation of mechanisms of aluminum adjuvant toxicity and autoimmunity in pediatric populations is found below.

<https://www.ncbi.nlm.nih.gov/pubmed/22235057>

Furthermore, the vaccine industry has no liability. The Vaccine Court has awarded over \$4 billion taxpayer dollars to vaccine victims, who represent only 1%-10% of injuries reported to VAERS.

HPV poses no immediate risk to the great majority of children. No need exists to vaccinate the sexually inactive. As far as the sexually active, HPV affects

a small percentage, making the cure far worse than the disease.

The proposed bill harms American children, intrudes upon parental rights, and curtails personal and religious freedom.

“The child is not the mere creature of the State; those who nurture him and direct his destiny have the right, coupled with the high duty, to recognize and prepare him for additional obligations”. Pierce v. Society of Sisters, 268 U.S. 510 (1925).

Please reject this ill-conceived bill.

Very Respectfully,

Pazit Edelman

Since 1986:

Pharmaceutical manufacturers producing vaccines were freed from ALL liability resulting from vaccine injury or death by the National Childhood Vaccine Injury Act. The NVICP, National Vaccine Injury Compensation Program, was established.

1989-2018:

Total payments to victims of vaccine injury =

\$4,000,103,277.34

Number of Compensated Awards =

6,267

Only 1-10% of cases are ever reported.

DTP: Diphtheria, Tetanus, Pertussis (whole cell)

OPV: Oral Polio

MMR: Measles, Mumps, Rubella

Td: Tetanus, Diphtheria

Hep B: Hepatitis B

DTaP: Diphtheria, Tetanus, Pertussis (acellular)

HIB: Haemophilus influenzae Type B

PCV: Pneumococcal

IPV: Inactivated Polio

Varicella: Chickenpox

Hep A: Hepatitis A

HPV: Human Papillomavirus (Gardasil)

Tdap: Tetanus, Diphtheria, Pertussis (acellular)
